wsm39624.github.io/Protofilio

PROFESSIONAL SUMMARY

Computer science graduate with hands-on experience across cloud computing, AI/ML engineering, full-stack development, and product UX. GCC Hackathon winner (1st place). Adept at turning technical challenges into real, deployable solutions - from intelligent career platforms to smart kiosk systems - with a strong focus on impact and user experience.

EDUCATION

Bachelor of Computer Science
Arab Open University

2022 – 2026 | Riyadh, KSA

PROFESSIONAL EXPERIENCE

Software Development Intern - Emerging Business Technologies CO. (EBTCO)

06/2026 – 08/2026

- Azure Cloud (AZ-104): Completed hands-on training on Microsoft Azure Administrator covering virtual machines, networking, storage, identity management, and resource management via Azure Portal and CLI.
- Web App Development: Designed and built a Dynamic Help Desk Scorecard Dashboard demo with real-time data visualization components in response to an internal technical assessment.
- AI Skills Development: Applied Y Combinator AI skills framework; practiced prompt engineering, AI-assisted coding, and integrating LLMs into development workflows.
- Multi-Environment Development: Delivered work across Lovable (AI-assisted app builder), Antigravity, and Visual Studio / VS Code, adapting tooling for each environment.
- Ain Kiosk Project (Visitor Experience Lead): Led visitor UX design for a smart reception system - architected three visitor flows (walk-in, pre-registered, VIP), implemented Arabic/English RTL bilingual interface, Receptionist Desk Mode, Privacy Receipt generation, and Zebra label printer integration for automated badge output.

ACADEMIC PROJECTS

Darbak.AI

Intelligent Career Guidance & Job Readiness Platform

- Developed an AI-powered platform connecting university talents with job market needs using Python, Flask, and Google Gemini API.
- Implemented a smart readiness engine that evaluates students against global CC2020 industry standards and outputs dynamic radar charts.
- Designed an intuitive portal for employers to filter verified candidates and automate professional outreach.

Data Analysis Project

Utilized Python to analyze and visualize the diabetes Patient dataset, extracting insights and identifying patterns using libraries such as Pandas and Matplotlib.

SKILLS

Languages & Frameworks

Python, Java, JavaScript, C#, HTML/CSS, SQL, MERN Stack, Flask, React, Node.js

Tools & Environments

VS Code, Visual Studio, Lovable, Antigravity, VS Code, Visual Studio, Lovable, Antigravity, UI/UX Design, RTL/Bilingual UX, Kiosk & Dashboard Design, Microsoft Office

Cloud & AI/ML

Microsoft Azure (AZ-104), Google Gemini API, Prompt Engineering, Generative AI, Computer Vision, Pandas, Matplotlib

Communication & Soft Skills

Presentation Skills, Problem Solving, Time Management, Teamwork & Leadership.

AWARDS AND HONORS

Kuwait AI Hackathon (GCC Level)

1st Place across the Gulf Cooperation Council (GCC) countries.

01/10/2025
