1st Place across the Gulf Cooperation Council (GCC) countries.

01/10/2025

EXPERIENCE

Data Analysis Project

Utilized Python to analyze and visualize the diabetes Patient dataset, extracting insights and identifying patterns using libraries such as Pandas and Matplotlib.

Darbak.AI

Intelligent Career Guidance & Job Readiness Platform

- Developed an AI-powered platform connecting university talents with job market needs using Python, Flask, and Google Gemini API.
- Implemented a smart readiness engine that evaluates students against global CC2020 industry standards and outputs dynamic radar charts.
- Designed an intuitive portal for employers to filter verified candidates and automate professional outreach.

ADDITIONAL INFORMATION

Personal Statement

Seeking to improve programming skills and technologies to provide successful digital solutions. I am passionate about continuous education, innovation, and using creativity in technology-driven environments.
